2

Training

Career Accelerator · bootcamps · single-tool courses · corporate

3

Talent (C2C)

Vetted MarTech contractors for client projects

4

Centre of Excellence

Operating model, governance and enablement set-up

Industries our founder has worked with: BFSI · Retail & E-commerce · Healthcare · Travel & Hospitality · Manufacturing · Education · Media & Entertainment

How C2C (corp-to-corp) engagement works

C2C means a contractor engages through their own registered business entity, which contracts with the vendor or client and invoices for the work, instead of being a salaried employee.

For clients

- Specialist AEP, RTCDP, AJO and CJA contractors
- Flexible duration, no employment overhead
- Interview before you commit

For consultants

- You contract through your own entity
- You manage your own taxes and benefits
- Skills-first matching to relevant projects

Rates, payment terms and eligibility are agreed per engagement and in writing. Tax and legal treatment varies by country: take professional advice.

TOC: Real-Time CDP and Journey Optimizer

RTCDP: Profiles

- Real-Time Customer Profile, merge policies
- Identity namespaces and graphs
- Customer 360 design

RTCDP: Activation

- Batch, streaming and edge evaluation
- Destinations, mapping, consent
- Activation QA and reconciliation

AJO: Build

- How AJO uses AEP profiles and events
- Event vs audience journeys
- Conditions, waits, personalisation, decisioning

AJO: Govern

- Suppression, frequency, consent
- Testing and approvals
- Journey reporting and troubleshooting

Interview focus: suppression audiences, event vs audience journeys, why a journey does not trigger.

TOC: Customer Journey Analytics and Web SDK

CJA: Setup

- Connections and datasets
- Person ID strategy
- Lookups and profile data

CJA: Analyse

- Data views, sessions, attribution
- Workspace, flow and fallout
- Adobe Analytics to CJA migration

Web SDK: Implement

- Edge Network, XDM data layers, datastreams
- Adobe Tags extension, ECID
- Page view and interaction events

Web SDK: Validate

- Consent and event forwarding
- Debugging and dataset previews
- Migration from AppMeasurement

Interview focus: CJA vs Adobe Analytics, data views, missing dataset debugging, Web SDK validation.

Interview preparation

1 Scenario test series

Interview-style AEP scenarios on segments, identity, merge policies and consent. Free with the bootcamp.

2 Whiteboard practice

Architect-style questions: Customer 360, sources to activation, batch vs streaming.

3 Portfolio projects

Six enterprise-style projects documented so you can walk through them in an interview.

4 Resume and LinkedIn

Positioning guidance for AEP, AJO, CJA and AI roles.

5 Career mapping call

Role-by-role map: developer, data engineer, analyst, QA, architect.

6 Free quiz

20 banking scenarios at infiante360techacademy.com/academy/aep-bfsi-quiz.html

Preparation improves readiness. It does not guarantee interviews, offers or placement.
