ABOUT US

What is Infinate360?

Infinate360 provides enterprise MarTech consulting and digital transformation services, helping organisations optimise customer data, analytics, personalisation and Adobe Experience Cloud technologies. Infinite360 Tech Academy is our learning arm: live and recorded programmes with hands-on labs and enterprise-style projects.

Founded by Pavan Babu Gandla

Fractional chief data architect and Adobe Experience Cloud specialist based in Bengaluru, India.

15+
years of experience

37+
projects delivered

As stated by our founder; not independently verified. No client is named or implied to endorse us.

1

Consulting

AEP · RTCDP · AJO · CJA · Web SDK · data and AI architecture

2

Training

Career Accelerator · bootcamps · single-tool courses · corporate

3

Talent (C2C)

Vetted MarTech contractors for client projects

4

Centre of Excellence

Operating model, governance and enablement set-up

Industries our founder has worked with: BFSI · Retail & E-commerce · Healthcare · Travel & Hospitality · Manufacturing · Education · Media & Entertainment

Our approach, vision and mission

Successful transformation is not just implementing technology. It connects people, data, processes, platforms and business objectives, moving organisations from fragmented customer data to real-time, intelligent, measurable experiences.

Vision

- Help organisations build intelligent, connected, future-ready digital businesses through technology, data, AI and customer experience innovation.

Mission

- Make enterprise technology simpler, smarter and more valuable for the business.

Three journeys, one platform

Enterprise Consulting

CDOs, CTOs, CMOs, MarTech leaders, architects

- Architecture reviews and readiness assessments
- AEP, RTCDP, AJO, CJA, Web SDK delivery
- AI and Agentic AI on enterprise data

Corporate Capability

L&D, delivery and transformation leaders

- Tailored team training and labs
- Project-based enablement
- Assessments and upskilling plans

Tech Academy

Professionals, career switchers, practitioners

- Live and recorded programmes
- Projects and interview preparation
- Free demos and Friday workshops

Each journey has its own entry point. Pick yours at infiante360techacademy.com

COURSES WE OFFER

Programmes, fees and timings

Programme	Format	Timing (IST)	Fee
AEP Launchpad bootcamp	Live, 3 hours + test series	Evening 6–9 PM; next date on site	**₹3,000**
Live AEP Foundations batch	Live, 2 weeks, Mon–Fri	8:00–9:30 AM, from 15 Oct 2026	**See site**
Friday hands-on workshops	Live, one AEP skill each	Fridays from 16 Oct 2026	**See site**
Adobe MarTech + Agentic AI Career Accelerator	Live online, 90 days	Batch timings shared at registration	**₹60,000**
AEP, AJO & CJA: Foundation + Advanced	Recorded, self-paced	Learn any time	**₹60,000**
Single-tool courses (RTCDP, AJO, CJA, Analytics, Web SDK, Agentic AI)	Focused paths	On request	**On request**
CXO Hive: Executive & Architecture	Live + 1 month support	By cohort	**₹1,00,000**
Live Customised MarTech Program	Live, individuals or teams	Agreed with you	**₹1,00,000**

Fees as published on the website; 'See site' items are confirmed at registration. Corporate pricing is quoted per engagement.

For organisations: CXO Hive and Live Customised

CXO Hive Programme: ₹1,00,000

- Setting up a MarTech / AI Centre of Excellence
- AI and agentic AI strategy
- Customer Data Platform strategy
- Enterprise architecture and governance
- GCC-to-global capability transformation
- Reusable capabilities and global delivery models
- One month of post-programme support

Live Customised Programme: ₹1,00,000

- Discovery: role, requirements, technology landscape
- Live sessions and labs on your tools
- Project work and reviews
- Capstone tied to a real use case
- For teams, consultancies and individuals
- Quoted per engagement for teams

Corporate pricing is quoted per engagement. Outcomes depend on participation and practice.

TOC: Career Accelerator (90 days, live)

Phase 1–2

- AEP core: XDM, datasets, ingestion, Profile, Identity, Query Service
- Web SDK, CJA and AJO: datastreams, connections, data views, real-time journeys

Phase 3–4

- RTCDP and activation: audiences, destinations, personalisation, validation
- Architect patterns: APIs, integration, security, environments, QA, monitoring

Phase 5–6

- Agentic AI and MCP: governed tools and agents
- Capstone and interview preparation

Projects

- Customer 360 data model
- Real-time transaction journey
- RTCDP activation
- CJA executive reporting
- Web SDK modernisation
- Agentic AI marketing assistant

Fee ₹60,000. Career mapping, resume and LinkedIn guidance included. Roles are target pathways; no placement is guaranteed.

TOC: Real-Time CDP and Journey Optimizer

RTCDP: Profiles

- Real-Time Customer Profile, merge policies
- Identity namespaces and graphs
- Customer 360 design

RTCDP: Activation

- Batch, streaming and edge evaluation
- Destinations, mapping, consent
- Activation QA and reconciliation

AJO: Build

- How AJO uses AEP profiles and events
- Event vs audience journeys
- Conditions, waits, personalisation, decisioning

AJO: Govern

- Suppression, frequency, consent
- Testing and approvals
- Journey reporting and troubleshooting

Interview focus: suppression audiences, event vs audience journeys, why a journey does not trigger.

TOC: Customer Journey Analytics and Web SDK

CJA: Setup

- Connections and datasets
- Person ID strategy
- Lookups and profile data

CJA: Analyse

- Data views, sessions, attribution
- Workspace, flow and fallout
- Adobe Analytics to CJA migration

Web SDK: Implement

- Edge Network, XDM data layers, datastreams
- Adobe Tags extension, ECID
- Page view and interaction events

Web SDK: Validate

- Consent and event forwarding
- Debugging and dataset previews
- Migration from AppMeasurement

Interview focus: CJA vs Adobe Analytics, data views, missing dataset debugging, Web SDK validation.

TOC: Adobe Analytics, Agentic AI & MCP, certification prep

Adobe Analytics

- Measurement plans and KPIs
- Variables, events, Adobe Tags, Web SDK
- Validation and QA
- Workspace reporting

Agentic AI & MCP

- Agents, planning and tool use
- MCP servers, clients, least privilege
- Human approval, logging, consent
- Marketing assistant capstone

AEP certification prep

- Read the current exam guide
- Core topics review
- Scenario and timed practice
- Independent of Adobe; no pass guaranteed

Pricing for single-tool courses is shared on request.

AI agent for journey optimisation: six layers

Layer	What it does	Interface
Data sources	Web/app SDK, CRM, commerce and offline events land in AEP and map to XDM	Edge Network, source connectors
Identity graph	Links device, CRM and loyalty identifiers into one identity cluster	Identity Service
Real-Time Profile	Merges identity-linked fragments into one addressable profile	Profile API
Segmentation	Streaming and batch audience qualification on the unified profile	Real-Time CDP
Journey trigger	Emits event triggers on segment change or a real-time event	Streaming segmentation, Edge events
AI agent decision layer	Reads profile, event and segment state, scores candidate actions, proposes a recommendation	MCP tool calls into AEP / CDP / AJO

Each layer is a hard boundary: the agent never bypasses a layer to reach raw source data or to deliver a message directly. This is a design pattern, not a client implementation.

AI agent workflow and decision logic

Outcomes from AJO feed the agent's next decision.

Seven workflow steps

- Event capture via Edge Network, mapped to XDM
- Identity resolution and profile update
- Context assembly with one MCP read
- Decision: score candidate actions
- Recommendation: action, content ID, channel, confidence, rationale
- Execution in AJO with frequency cap, consent, fallback
- Feedback: outcomes become the next reward signal

Decision logic

- Trigger: cart abandonment, churn-risk signal, high-intent browse
- Candidates scoped to segment and journey state
- Scoring on propensity and past engagement of similar profiles
- Policy gate: consent, frequency caps, brand and legal rules
- Emit, or hold: no recommendation rather than a default
- The agent recommends; only AJO delivers messages

ENTERPRISE CAPABILITY

MarTech Centre of Excellence: how we set it up

1. Assess

- Current stack and skills
- Ambition and sponsors
- Use-case backlog

2. Design

- Operating model and roles
- Governance and consent
- Architecture standards

3. Build

- Reusable templates and data models
- Environments and release process
- Enablement and training

4. Operate

- Intake and prioritisation
- Quality and measurement
- Continuous improvement

What a CoE gives you

- One owner for MarTech standards, consent and data quality
- Faster delivery through reusable assets and trained teams
- A clear path from GCC capability to global delivery
