ABOUT US

What is Infinate360?

Infinate360 provides enterprise MarTech consulting and digital transformation services, helping organisations optimise customer data, analytics, personalisation and Adobe Experience Cloud technologies. Infinite360 Tech Academy is our learning arm: live and recorded programmes with hands-on labs and enterprise-style projects.

Founded by Pavan Babu Gandla

Fractional chief data architect and Adobe Experience Cloud specialist based in Bengaluru, India.

15+
years of experience

37+
projects delivered

As stated by our founder; not independently verified. No client is named or implied to endorse us.

1

Consulting

AEP · RTCDP · AJO · CJA · Web SDK · data and AI architecture

2

Training

Career Accelerator · bootcamps · single-tool courses · corporate

3

Talent (C2C)

Vetted MarTech contractors for client projects

4

Centre of Excellence

Operating model, governance and enablement set-up

Industries our founder has worked with: BFSI · Retail & E-commerce · Healthcare · Travel & Hospitality · Manufacturing · Education · Media & Entertainment

Our approach, vision and mission

Successful transformation is not just implementing technology. It connects people, data, processes, platforms and business objectives, moving organisations from fragmented customer data to real-time, intelligent, measurable experiences.

Vision

- Help organisations build intelligent, connected, future-ready digital businesses through technology, data, AI and customer experience innovation.

Mission

- Make enterprise technology simpler, smarter and more valuable for the business.

Three journeys, one platform

Enterprise Consulting

CDOs, CTOs, CMOs, MarTech leaders, architects

- Architecture reviews and readiness assessments
- AEP, RTCDP, AJO, CJA, Web SDK delivery
- AI and Agentic AI on enterprise data

Corporate Capability

L&D, delivery and transformation leaders

- Tailored team training and labs
- Project-based enablement
- Assessments and upskilling plans

Tech Academy

Professionals, career switchers, practitioners

- Live and recorded programmes
- Projects and interview preparation
- Free demos and Friday workshops

Each journey has its own entry point. Pick yours at infiante360techacademy.com

ENTERPRISE CAPABILITY

MarTech Centre of Excellence: how we set it up

1. Assess

- Current stack and skills
- Ambition and sponsors
- Use-case backlog

2. Design

- Operating model and roles
- Governance and consent
- Architecture standards

3. Build

- Reusable templates and data models
- Environments and release process
- Enablement and training

4. Operate

- Intake and prioritisation
- Quality and measurement
- Continuous improvement

What a CoE gives you

- One owner for MarTech standards, consent and data quality
- Faster delivery through reusable assets and trained teams
- A clear path from GCC capability to global delivery

AI agent for journey optimisation: six layers

Layer	What it does	Interface
Data sources	Web/app SDK, CRM, commerce and offline events land in AEP and map to XDM	Edge Network, source connectors
Identity graph	Links device, CRM and loyalty identifiers into one identity cluster	Identity Service
Real-Time Profile	Merges identity-linked fragments into one addressable profile	Profile API
Segmentation	Streaming and batch audience qualification on the unified profile	Real-Time CDP
Journey trigger	Emits event triggers on segment change or a real-time event	Streaming segmentation, Edge events
AI agent decision layer	Reads profile, event and segment state, scores candidate actions, proposes a recommendation	MCP tool calls into AEP / CDP / AJO

Each layer is a hard boundary: the agent never bypasses a layer to reach raw source data or to deliver a message directly. This is a design pattern, not a client implementation.

For organisations: CXO Hive and Live Customised

CXO Hive Programme: ₹1,00,000

- Setting up a MarTech / AI Centre of Excellence
- AI and agentic AI strategy
- Customer Data Platform strategy
- Enterprise architecture and governance
- GCC-to-global capability transformation
- Reusable capabilities and global delivery models
- One month of post-programme support

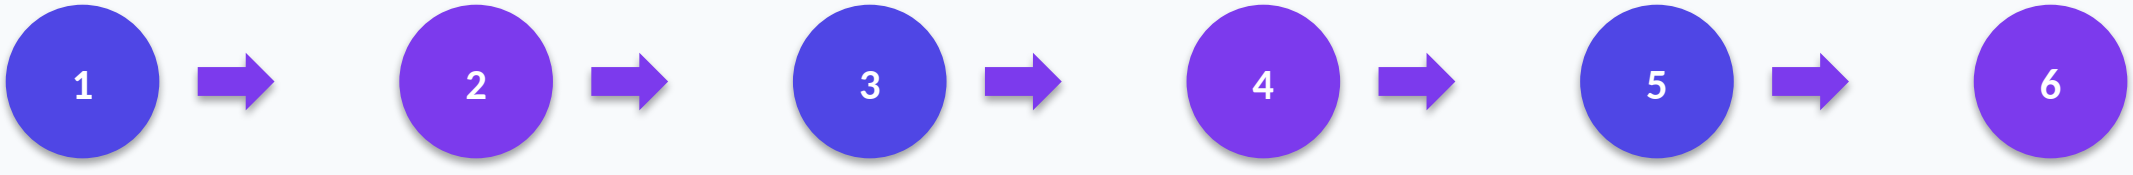

Live Customised Programme: ₹1,00,000

- Discovery: role, requirements, technology landscape
- Live sessions and labs on your tools
- Project work and reviews
- Capstone tied to a real use case
- For teams, consultancies and individuals
- Quoted per engagement for teams

Corporate pricing is quoted per engagement. Outcomes depend on participation and practice.

How C2C (corp-to-corp) engagement works

C2C means a contractor engages through their own registered business entity, which contracts with the vendor or client and invoices for the work, instead of being a salaried employee.

For clients

- Specialist AEP, RTCDP, AJO and CJA contractors
- Flexible duration, no employment overhead
- Interview before you commit

For consultants

- You contract through your own entity
- You manage your own taxes and benefits
- Skills-first matching to relevant projects

Rates, payment terms and eligibility are agreed per engagement and in writing. Tax and legal treatment varies by country: take professional advice.

Let's talk

Tell us what you need: learning, a contractor, or a Centre of Excellence.
